

PRODUCT OVERVIEW

IBSengage™

Exceptional eyecare for everyone

Who are we?

IbisVision is a technology company working in the optometry space providing accessible solutions to eyecare. Our team has developed an advanced online platform with a suite of best in class products and exams, allowing eye care professionals to provide the best possible service to customers and patients.

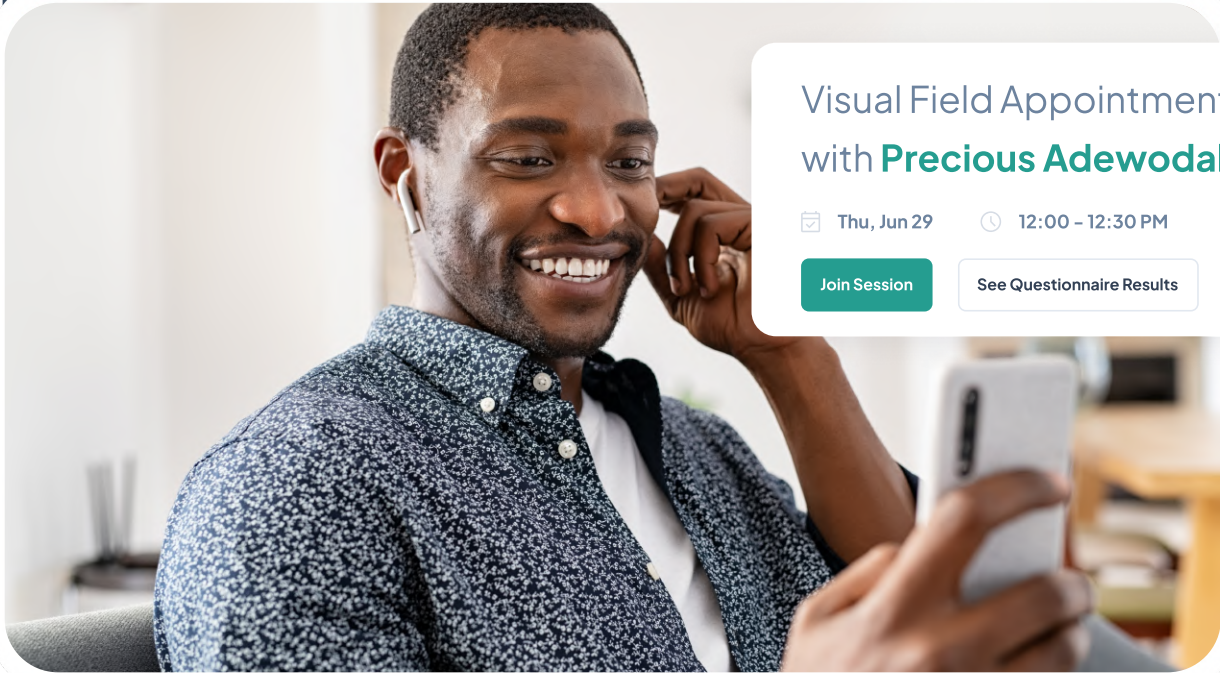

As a cloud-based platform, IBISengage can be accessed easily online via a laptop, desktop, smartphone or tablet and an internet connection. Designed with the patient in mind, IBISengage provides a first-class online testing experience, always linking the patient and eye doctor, anywhere and at any time.

IbisVision has combined the experience of clinicians and cutting-edge technology to create an online platform capable of transforming the patient and doctor journey. To ensure we are meeting the needs of the sector for both patients and clinicians alike, we are working with and have previously worked with:

ANYWHERE. ANYTIME.

✔ Test patients online with the eye doctor leading the appointment and testing remotely.

✔ We support various types of online appointments including triage and contact lens checks.

✔ Class 1 medical device listed with the US FDA and a CE marked class 1 medical device in Europe and the UK.

Compatible Devices

Desktop

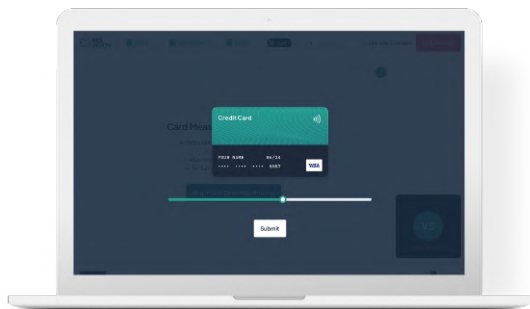

Tablet

Laptop

Mobile

Positioning & Calibration

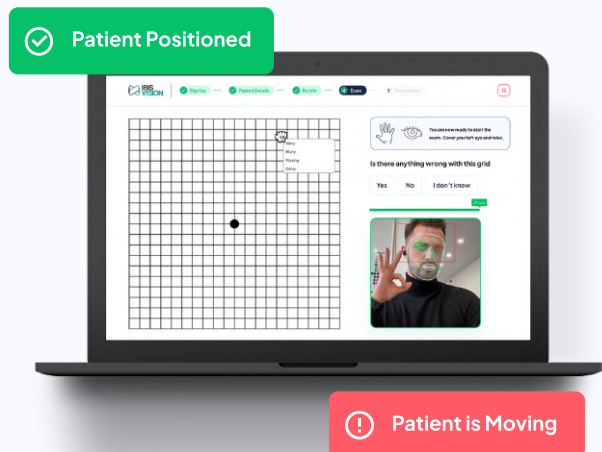

1 Calibration

Using a business, Bank, or Credit card we calibrate the patient's device screen. This allows each examination to be displayed using the full device display available.

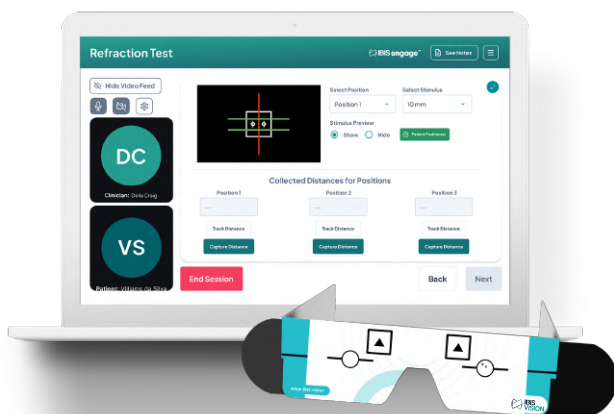

2 Movement Detection

We use advanced facial recognition techniques coupled with patient-inputted data to control environmental factors such as screen size, luminosity, and distance.

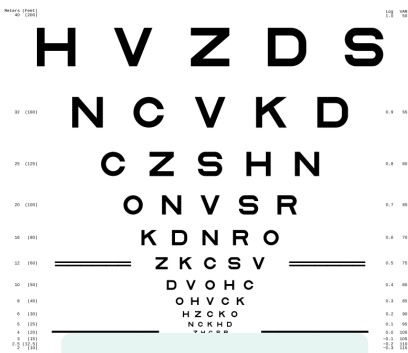

3 Precision

A small device is sent to the patient and is used to fine-tune the distance for some examinations such as refraction.

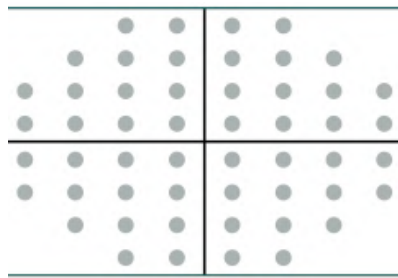

Our Exams

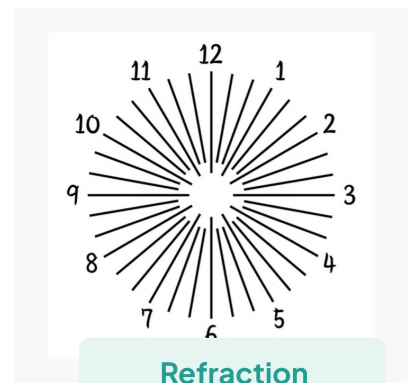

IBISengage™ contains a suite of eye exams that can be completed remotely with the live instruction of an eye care professional, including the **world's first synchronous remote refraction.**

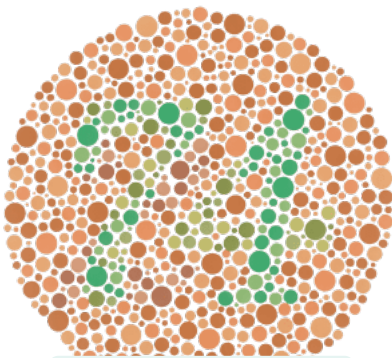

Visual Acuity

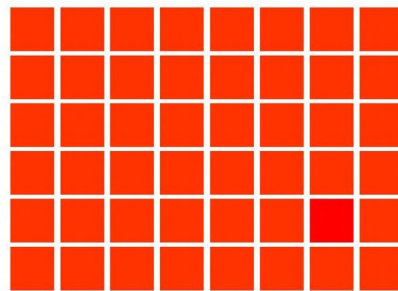

Visual Field

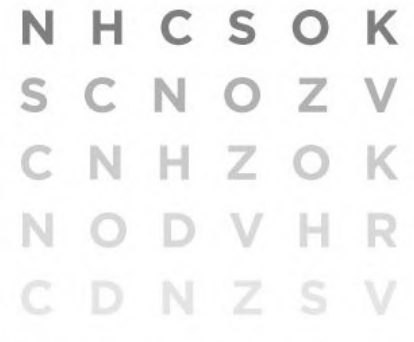

Refraction

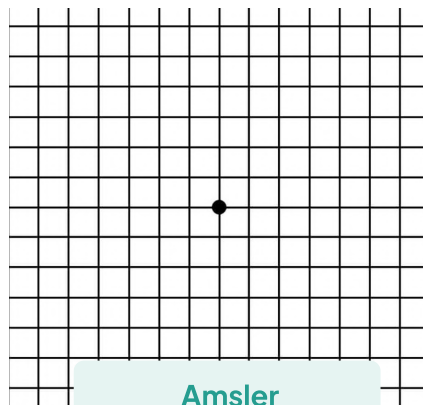

Color

Motility

Contrast Sensitivity

Amsler

World's First Synchronous Remote Refraction

Step into the future with IbisVision and determine a patient's prescription remotely in just a few minutes. Our user-friendly platform allows patients to undergo online refraction from the comfort of their home, guided by their eyecare professional.

With IbisVision's online refraction technology you can:

- ✔ **Provide convenient and fast prescriptions**
- ✔ **Utilise a live video connection to conduct online appointments**
- ✔ **Receive patient results immediately**
- ✔ **Offer an alternative to in-clinic visits with no travel necessary for patients**
- ✔ **Optimize clinician time and provide a seamless and efficient online testing experience for patients**

Other Features

We don't just facilitate remote eye exams. Take a look at what else we can do.

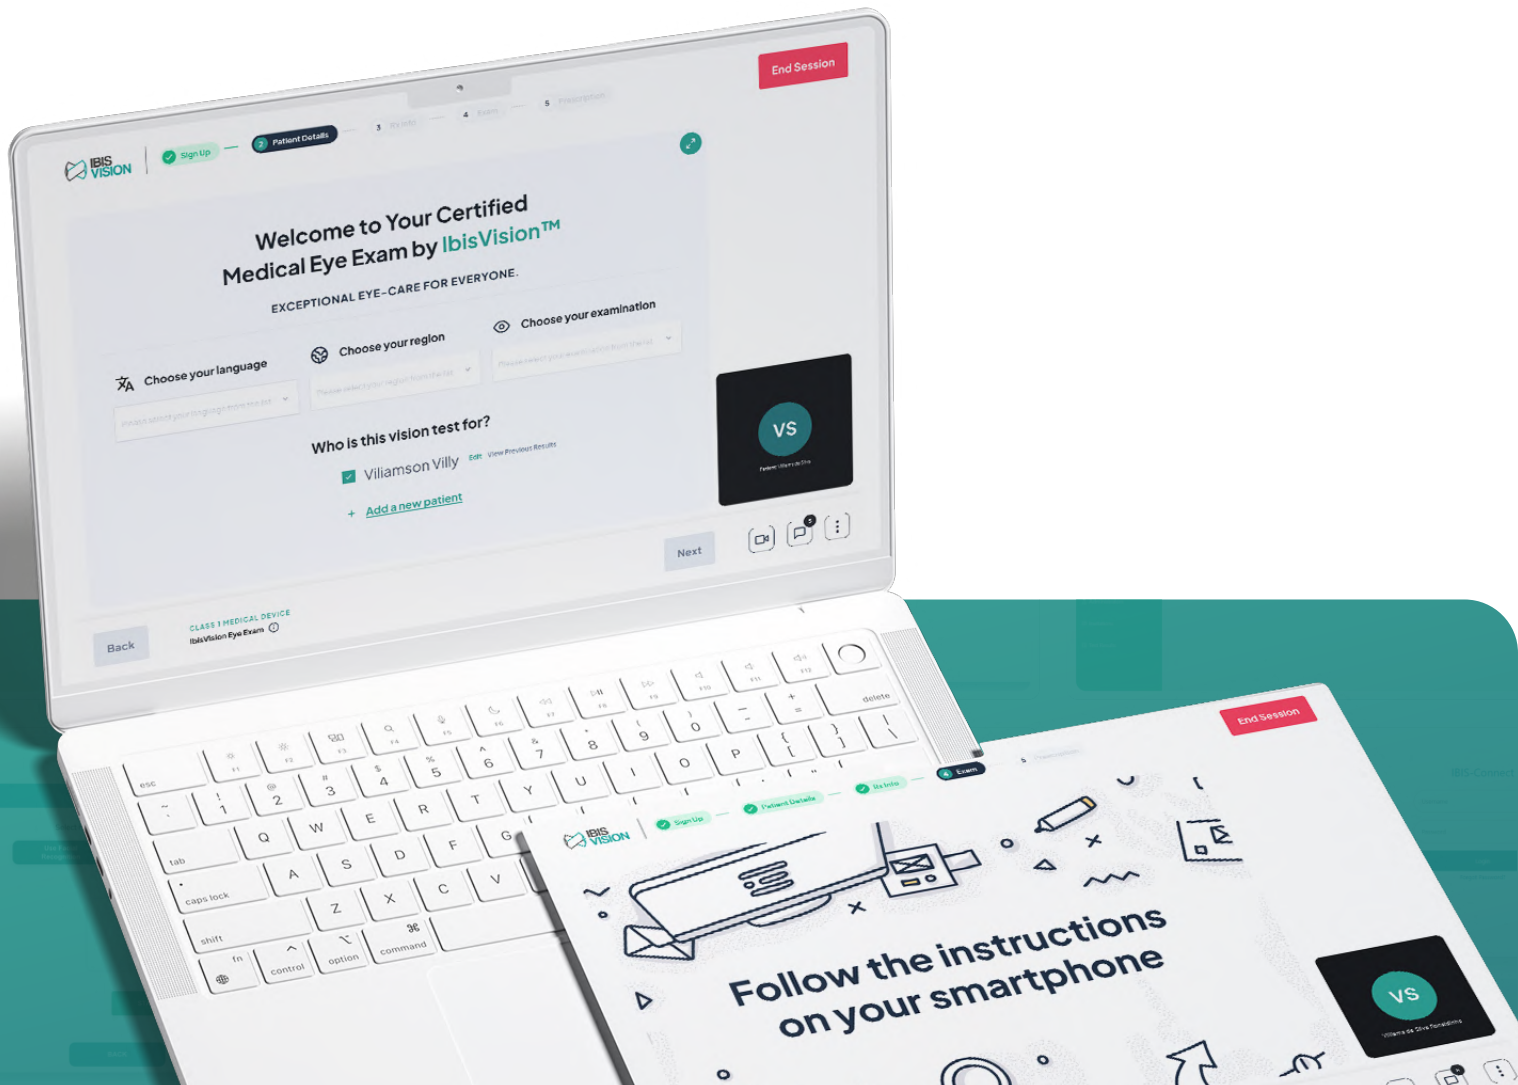

✔ Appointment scheduling

✔ Remote triage functions

✔ Questionnaire builder

✔ Remote patient monitoring

✔ Monitor disease progression

Why choose us?

Volume

Increase volume of consultations by moving aspects of your patient journey online.

Revenue

With more services, both patient fees and product sales will increase.

Convenience

Patients can schedule appointments when it's suitable for them, on any device they want.

Efficiency

Offer a less expensive alternative to in-office visits with less time spent travelling for patients and freeing up time for eye doctors to see more patients.

Digital

No need to purchase more expensive, bulky equipment. All you need is a laptop or desktop and an internet connection to get started.

Confidence

IBISengage is FDA listed, CE-marked and HIPAA compliant.
